Multinomial Logistic Regression

- Multinomial logistic regression is used to model nominal outcome variables, in which the log odds of the outcomes are modeled as a linear combination of the predictor variables.

Multinomial Regression with R

The main package we will use is the **nnet** package. We will also use the **ggplot2** and **reshape2** package.

```
install.packages("nnet")
library(nnet)

library(ggplot2)
library(reshape2)
```

Examples of multinomial logistic regression

Example 1. Entering high school students make program choices among general program, vocational program and academic program. Their choice might be modeled using their writing score and their social economic status.

Examples of multinomial logistic regression

Example 2. People's occupational choices might be influenced by their parents' occupations and their own education level. We can study the relationship of one's occupation choice with education level and father's occupation. The occupational choices will be the outcome variable which consists of categories of occupations.

Examples of multinomial logistic regression

Example 3. A biologist may be interested in food choices that alligators make. Adult alligators might have different preferences from young ones. The outcome variable here will be the types of food, and the predictor variables might be size of the alligators and other environmental variables.

Description of the Data

We will use the third example using the *multilog* data set (or *ml*).

```
ml <- read.csv("multilog.csv",header=T)
```

Description of the Data

- The outcome variable is **prog**, program type.
- The two predictor variables are

1. social economic status, **ses**, (a three-level categorical variable)
2. writing score, **write**, (a continuous variable).

- The data set contains variables on 200 students.

Multinomial Regression with R

```
table(ml$ses, ml$prog)
```

```
        general academic vocation
low          16       19       12
middle       20       44       31
high          9       42        7
```

```
                M    SD
 general    51.33 9.398
 academic   56.26 7.943
 vocation   46.76 9.319
```
